1. NATURE AND DESCRIPTION OF THE COMPANY

Brookfield Power Corporation (the "Company") was incorporated under the laws of Ontario on June 20, 2002. The activities of the Company commenced on December 16, 2004, upon the issuance of the term debentures.

The Company is a wholly owned subsidiary of Brookfield Power Inc. ("BPI").

2. BASIS OF PRESENTATION

The Company's unaudited interim financial statements have been prepared in accordance with Canadian generally accepted accounting principles applicable to interim financial statements. All amounts are reported in thousands of Canadian dollars, except as otherwise noted. These unaudited interim financial statements should be read in conjunction with the 2006 annual audited financial statements.

These unaudited interim financial statements have been prepared on a basis consistent with the disclosed audited financial statements for the fiscal year ended December 31, 2006, with the exception of the changes in accounting policies described in note 3.

The preparation of these unaudited interim financial statements requires management to make assumptions and estimates that affect the amounts reported in the financial statements and the notes. Actual results could differ from these estimates. The results reported in these financial statements should not be regarded as necessarily indicative of results that may be expected for the entire year.

3. CHANGES IN ACCOUNTING POLICIES

On January 1, 2007, the Company adopted the following new accounting standards for Canadian generally accepted accounting principles:

Handbook Section 1530, Comprehensive Income

This section establishes standards for reporting and presenting comprehensive income, which is defined as the change in shareholder's equity from transactions and other events from non-owner sources. This standard requires certain gains and losses to be presented in other comprehensive income until it is considered appropriate to recognize into net income. Major components for this category include unrealized gains and losses on financial assets classified as available-for-sale, unrealized foreign currency translation amounts, net of hedging, arising from self-sustaining foreign operations, and changes in the fair value of the effective portion of cash flow hedging instruments. There was no impact on the adoption of this new standard on the Company's financial statements as at January 1, 2007.

March 31, 2007 (unaudited)

Handbook Section 3251, Equity

The Company adopted Section 3251, Equity replacing Section 3250, Surplus. This section describes the presentation of equity and changes in equity for a reporting period as a result of the application of Section 1530, Comprehensive income. There was no impact on the adoption of this new standard on the Company's financial statements as at January 1, 2007.

Handbook Section 3855, Financial Instruments – Recognition and Measurement

Under Section 3855, all financial instruments are classified as one of the following: held-for-trading, held-to-maturity, loans and receivables, other financial liabilities, or available-for-sale financial assets. Financial assets and liabilities held-for-trading are measured at fair value with gains and losses recognized in net income. Financial assets held-to-maturity, loans and receivables and financial liabilities other than those held-for-trading, are measured at amortized cost using the effective interest rate method of amortization. Available-for-sale financial instruments are measured at fair value with unrealized gains and losses recognized in other comprehensive income. Transaction costs are expensed as incurred for financial instruments classified or designated as held-for-trading. For other financial instruments, transaction costs are capitalized on initial recognition.

The Company has implemented the following classification:

Cash is designated as a financial asset held-for-trading and is measured at fair value through net income at each period end.

Accounts receivable, interest receivable and the promissory notes from BPI are classified as loans and receivables. Accounts payable, interest payable and due to related parties are classified as other financial liabilities. These accounts are measured at fair value at inception which, due to their short-term nature, approximates amortized cost.

Long-term debt is classified as other financial liability. After its initial fair value measurement, it is measured at amortized cost using the effective interest rate method.

Starting January 1, 2007, the Company is now using the effective interest rate method to amortize its deferred financing fees; previously, these amounts were amortized on a straight-line basis over the term of the related financing.

Deferred financing fees related to the Company's available credit facility continue to be presented separately on the balance sheet and are being amortized on the statement of loss over the remaining term of the credit facility.

March 31, 2007

(unaudited)

The Company selected January 1, 2003 as its transition date for embedded derivatives. An embedded derivative is a component of a hybrid instrument that also includes a non-derivative host contract, with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. If certain conditions are met, an embedded derivative is separated from the host contract and accounted for as a derivative at its fair value. This standard had no impact on the financial statements of the Company.

The adoption of this section is done retroactively without restatement of the financial statements of prior periods. As at January 1, 2007, the impact on the financial statements of measuring the financial assets and liabilities using the effective interest rate method and reclassifying the deferred financing fees directly attributable to the issuance of the long-term debt is summarized in the table below:

	December 31,	January 1,	Net Financial
	2006	2007	Impact
Long-term debt	(800,059)	(795,131)	4,928
Deferred financing fees	5,346	535	(4,811)
Future income tax asset	1,216	1,177	(39)
Shareholder's deficit (net of tax impact)	2,458	2,380	(78)

Handbook Section 3865, Hedges

This standard specifies the criteria under which hedge accounting can be applied and how hedge accounting can be executed for each of the permitted hedging strategies: fair value hedges, cash flow hedges and hedges of a foreign currency exposure of a net investment in a self-sustaining foreign operation. In a fair value hedging relationship, the carrying value of the hedged item is adjusted by gains or losses attributable to the hedged risk and recognized in net income. This change in fair value of the hedged item, to the extent that the hedging relationship is effective, is offset by changes in the fair value of the derivative. In a cash flow hedging relationship, the effective portion of the change in the fair value of the hedging derivative will be recognized in other comprehensive income. The ineffective portion will be recognized in net income. The amounts recognized in accumulated other comprehensive income (AOCI) will be reclassified to net income in the periods in which the net income is affected by the variability in the cash flows of the hedged item. In hedging a foreign currency exposure of a net investment in a self-sustaining foreign operation, foreign exchange gains and losses on the hedging instruments will be recognized in other comprehensive income. There was no impact on the adoption of this new standard on the Company's financial statements as at January 1, 2007.

March 31, 2007 (unaudited)

4. DERIVATIVE FINANCIAL INSTRUMENTS

The Company has entered into forward-starting interest rate swap agreements with major financial institutions on behalf of other subsidiaries of BPI that do not currently maintain the necessary credit facilities to execute agreements of this nature. The agreements, which have a notional amount totaling \$300 million, are intended to lock in a fixed interest rate on the anticipated issuance of long-term debt to finance a wind farm operating in Northern Ontario.

On the same date, the Company entered into offsetting forward-starting interest rate swap agreements with the subsidiaries of BPI that anticipate issuing the fixed rate debt. As a result of these offsetting positions, the Company will pay to or receive from its related parties amounts that exactly offset its rights and obligations under the forward-starting interest rate swaps with the third party financial institutions.

As of March 31, 2007, the fair value of the swaps with third parties of (\$3.0) million was recognized as a derivative liability with the corresponding loss reflected in net loss. At the same time, the fair value of the swaps with related parties of \$3.0 million was recognized as a derivative asset with the corresponding gain reflected in net loss. The net impact of the revaluation of all swaps on the Company's net loss for the period ended March 31, 2007 was \$nil.

5. COMPARATIVE FIGURES

Certain of the prior period's figures have been reclassified to conform to the 2007 presentation.

March 31, 2007 (unaudited)

EARNINGS COVERAGE RATIOS

The earnings coverage ratios of Brookfield Power Corporation (the "Company") for the 12-month periods ended March 31, 2007 and 2006 are less than one-to-one.

The Company's interest requirements for the 12-month period ended March 31, 2007 amounted to \$33.4 million, and for the 12-month period ended March 31, 2006 amounted to \$24.6 million. The Company's earnings before interest and income tax for the 12-month period ended March 31, 2007 was \$30.9 million, and for the 12-month period ended March 31, 2006 was \$23.1 million, which is approximately 0.93 and 0.94 times the Company's aggregate interest requirements for the respective periods. In order to achieve an earnings coverage ratio of one-to-one, the Company would need to have earned an additional \$2.5 million and \$1.5 million for the respective periods.

Brookfield Power Inc.'s (the "Guarantor") interest requirements, including interest on capital securities, for the 12-month period ended March 31, 2007 amounted to US\$377 million, and for the 12-month period ended March 31, 2006 amounted to US\$357 million. The Guarantor's earnings before interest and income tax for the 12-month period ended March 31, 2007 was US\$440 million, and for the 12-month period ended March 31, 2006 was US\$432 million, which is approximately 1.17 and 1.21 times the Guarantor's aggregate interest requirements for the respective periods.

The Guarantor's interest requirements, excluding interest on capital securities, for the 12-month period ended March 31, 2007 amounted to US\$252 million, and for the 12-month period ended March 31, 2006 amounted to US\$234 million. The Guarantor's earnings before interest and income tax for the 12-month period ended March 31, 2007 was US\$440 million, and for the 12-month period ended March 31, 2006 was US\$432 million, which is approximately 1.75 and 1.85 times the Guarantor's aggregate interest requirements, excluding interest on capital securities, for the respective periods.
